Average price of top 10 toyota models between 1998 and 2020

From the above graph, we can see that more recent models (years 2020) have higher average prices i.e. the longer you use the car, its price goes down. Average prices of some models decline faster than others, for example RAV-4 and Hilux.

Next let preview our final prepared dataset for a modeling phase.

เมื่อเรียน Bootcamp แล้ว อ. ถามว่า "Are you a professional data analyst?" แปลว่า ยังจะมาเรียนอีกทำไม

#Practicum #Yandex #DataScienceBootcamp

Every year since 1990, there were about 8.19 platforms available in the market each year. Lifespan of the platform, on average, was about 8.3 years. Line charts in this section shows that change in platform landscape changed every 3-5 years since 1990. This also means that new technologies came out every 3-5 years period.

Reviewer's comment:

Are you a professional data analyst? You have to know, your analytical skill is pretty strong

For each region (NA, EU, JP), determine:

- The top five platforms. Describe variations in their market shares from region to region.
- The top five genres. Explain the difference.
- Do ESRB ratings affect sales in individual regions?

First things I am going to do in this section is to reshape the dataframe, so that we can make summary table easier.

```
In [86]: # create NA, EU and JP sales
chosen_cols = ['name', 'platform', 'platform_group', 'year_of_release', 'genre',
               'critic_score_filled', 'user_score_filled', 'rating', 'total_sales']
```

A scenic landscape featuring a wide valley floor in the distance, surrounded by steep, rugged mountains. The mountains are partially covered in snow, particularly on their peaks and upper slopes. The foreground is filled with dense evergreen trees, likely spruce or fir, which are dark green and appear to be growing on a hillside. The sky is a vibrant blue, dotted with soft, white clouds. The overall atmosphere is bright and clear, suggesting a sunny day.

อยากเริ่มทำ Data Science โดยไม่ต้องเขียนโปรแกรม?

เชื่อว่าหลายคนคงมีความคิดแบบนี้ :P อยากลองทำ data science / machine learning แต่ยังไม่เวลาเขียนเขียนโปรแกรม ... จึงลองทำใน Excel แทนได้ไหม?

ตอบเลยว่า ได้ซี !! spreadsheet เอาจริงทำได้ (literally) เพราะงั้นทุกโมเดลเลยครับ อาจจะไม่ใช่ทำ R / Python (แต่สิ่งนี้จะไม่สามารถจัดการข้อมูลขนาดใหญ่ได้ เป็ลลู่ไม่ค้างมี 555+) แต่การทำ modeling ใน Excel ถือเป็จุดเริ่มต้นที่ดีสำหรับเพื่อนที่สนใจด้านนี้ แล้วทำไม machine learning ถึงต้องเขียน?
